From the book Cultural Monuments in Schleswig-Holstein, Volume 2, City of Flensburg, Wachholtz-Verlag, 2001

p. 294: "Two-storey eaves house with plastered facade and narrow terrace framed by field stone retaining wall, built in the last quarter of the 18th century. Inside the upper floor room with painted longitudinal wall, here within the painted division in three fields each surrounded by stylized tendrils ovals with allegorical representations of the four temperaments, the five senses and the three religions Jewish, Christianity and Islam, probably executed around 1800. The paintings were based on copper engravings by Bernhard Rode from the 1788 publication by Karl Wilhelm Ramler in Berlin, Allegorical Figures for the Use of Visual Artists."
